

## Refinement and resistance

### The new material for Tableware

Even on the big day, elegant and fine dinner sets made of Zenix® are strong enough to resist anything. In daily life, Zenix® is up to **3 times more resistant to shocks and chipping** than porcelain. Zenix® allows for surprising and smart designs suitable for today's uses. The plate offers a silky touch on both sides. Zenix® doesn't care if the sharpest knives scratch it, as they slide over its perfectly smooth surface even after 300 dishwasher cycles.
